## PROJECTS

---

### **Fitness Tracker App**

<https://move-groove-rails.herokuapp.com>

- Combined a Ruby on Rails back-end with a front-end in React to build an activity tracker, allowing user to add activities and monitor their overall fitness trends

### **Website for a Bike Race**

<https://github.com/ain88/boulder-bike-tour>

- Created a website for a prestigious bike race that allow people to track riders, see Flickr photos from the event, and more via a site back-end, front-end, and external APIs
